New forms have emerged, actively seeking the collaboration of authors in order to create texts that make use of the new possibilities collaboration grants. Though it has not yet achieved the same level of normality as single-author writing, collaborative writing nonetheless has a wide range of readers. As in all forms of writing, readers always try to find an entity that accounts for the text and guides their interpretation. A concept that tries to help in that process is the implied author. While its usefulness is debateable in one-authored writing, this concept is more interesting in collaborative written works as the number of real authors not necessarily corresponds to an equal number of implied authors. This paper is going to prove that coherence is...
